CAREER VISION

Courteous and spirited, I'm curious about IT and everything in its orbit. I recently began to be fascinated by net programming, e.g. developing apps and building websites. I gained expertise operating during this space. As this space enhances my studies, I'm keen to realize a lot of expertise within the field. For this reason, I'm trying to find a corporation willing to supply Pine Tree State a placement among their developers. In return, I might supply my full commitment, and be a nice and friendly addition to your team. I'm so presently trying to find employment as a front-end developer.

PROFESSIONAL EXPERIENCE

Technical Engineer   **Aug 2021 - Present**
Huawei Technologies India Pvt. Ltd., Gurgaon

Aditya Birla Intermediate College, Renukoot

CERTIFICATIONS

Project Completion Certificate (Virtual Intelligence)

2020

All soft Solution - MO/MAY2020/B 1613

The proposed system was based on the voice recognition in commands which converts the speech to text. The user gets easy access to speech than getting typed in the keyboard. The user spells the commands in the voice so that the user should have good quality of microphones. The user should spell the word in correct pronunciation which should be understandable to the voice Recognition system.
